

EARTHCHECK TRAINING PROGRAMS

Participating in approved EarthCheck training courses will ensure the success and continuity of your sustainability policy and programs and facilitate the EarthCheck process by developing capacity within your organisation. EarthCheck training programs are designed for EarthCheck Coordinators, business Managers and staff to learn about the EarthCheck process and requirements for Benchmarking and Certification. Our training programs provide practical skills for developing, implementing and maintaining an effective sustainability system for your business.

ONLINE TRAINING MODULES

EarthCheck Training modules are now available online. Delivered via webinar, they enable flexible learning and offer accessible and cost effective training options for Members wishing to expand their knowledge of the EarthCheck program and sustainability policy and processes.

Flexible Learning - With modules delivered throughout the year, Members can choose training options specific to their current training needs and progress through the EarthCheck program.

Accessible & Cost Effective - Online programs delivered via webinar offer ease of access to EarthCheck Members across the globe and reduces costs associated with travel and training.

For details of training dates refer to the EarthCheck Training Calendar.

GROUP TRAINING

In-house or online group training provides a valuable learning opportunity and forum for groups. Groups may include enterprise, industry or sector groups. Group training assists to align a company's sustainability goals and efforts of group participants.

It facilitates group wide commitment to and adoption of sustainable policy and practice and provides an opportunity for participants to share and learn from each other's experiences and knowledge.

Group training programs are available online and in-house.

MASTER TRAINER

The EarthCheck Master training program aims to develop capacity within organisations to guide and drive its sustainability efforts and commitment through the up-skilling of in-house trainers to deliver approved EarthCheck training programs.

EARTHCHECK AUDITOR WORKSHOPS

Auditor workshops are scheduled throughout the year. They open possibilities for environmental professionals, to obtain formal training on the EarthCheck Company Standard.

The workshop is designed for those who already have auditing experience and those who hold environmental auditor qualifications (ISO 14001) and wish to expand the scope of their auditing skills.

Coordinators

The first 3 days of the Auditor program covers components of the EarthCheck Coordinator program and are open to EarthCheck Members and industry professionals wishing to extend their knowledge of the EarthCheck Company Standard and its requirements. The program includes an onsite mock audit.

For details of training dates refer to the EarthCheck Training Calendar.

EARTHCHECK TRAINING COURSE OVERVIEW AND OUTLINE

[5A] Introduction to EarthCheck

1.5 hours

Group rate: AU\$800 (max 20 pax)
Individual rate: AU\$135 pp (6 – 15 pax)
Delivery: In-house or Online
Scheduled Modules: Available Online

Understanding the principals of sustainability and the EarthCheck system is a critical first step in your journey of sustainability

This introductory module aims to provide participants with an overview of the EarthCheck Company Standard, program requirements and benefits of adopting an operational framework for sustainability. It will provide Managers, Staff and EarthCheck Coordinators with an opportunity to learn how the EarthCheck system can facilitate improved business performance and resource efficiency.

Recommended for:

This program is particularly beneficial for managers, EarthCheck Coordinators, Green Teams and staff wishing to gain an understanding of the EarthCheck program, its requirements and benefits of sustainable policy and practices.

Course Outline

- Sustainability and your business
- Introduction to EarthCheck
- Benefits of participation
- Introduction to the Company Standard and Key Performance Areas
- The 6 Step Process
- EarthCheck Tools & Resources

Outcome

Following completion of the workshop, participants should be able to:

- ✓ Demonstrate an understanding of the EarthCheck Program, including the Key Performance Areas, Key Program steps and requirements for benchmarking and certification
- ✓ Navigate EarthCheck tools and resources to complete the benchmarking and certification process

Course Materials

Copies of presentation material will be provided to participants.

[5B] Policy Development & Benchmarking (Key step 1 & 2)

2 hours

Group rate: AU\$1000 (max 20 pax)
Individual rate: AU\$165 pp (6 – 15 pax)
Delivery: In-house or Online
Scheduled Modules: Available Online

***‘You can’t manage what you don’t measure’
Implementation of a sustainability policy and measuring your operational performance will provide the foundations for greater operational efficiency and sustainable outcomes for your business***

This module guides participants in the development of a sustainability policy and the EarthCheck Benchmarking process. It explores the EarthCheck benchmarking methodology and provides practical guidance and techniques for data collection and measurement. The program includes an online demonstration of the EarthCheck Benchmarking software.

This module relates to key steps 1 and 2 of the EarthCheck Company Standard

Course Outline

- Developing an Environmental & Social Sustainability Policy
- Benchmarking overview
- Benchmarking in context
- The benchmarking process
- Carbon reporting with EarthCheck
- Benchmarking Sectors, indicators and measures
- Introduction to the EarthCheck Benchmarking Software
- Benchmarking Assessment & Report

Outcome

Following completion of the workshop, participants should be able to:

- ✓ Understand the requirements and process for benchmarking with EarthCheck
- ✓ Collect, enter and submit their benchmarking data through the EarthCheck Benchmarking Software
- ✓ Design and implement an effective data collection process
- ✓ Interpret and communicate the results of their benchmarking assessment & report
- ✓ Meet your organisational KPI’s via ongoing performance measurement?

Course Materials

Participants will be provided with an electronic copy of the module workbook and presentation.

[5C.1] Planning, Culture Change & Compliance (Key Step 3)

2 hours

Group rate: AU\$1000 (max 15 pax)
Individual rate: AU\$165 pp (6 – 15 pax)
Delivery: In-house or Online
Scheduled Modules: Available Online

Managing the planning process, culture change and understanding compliance in your organisation will help you achieve sustainability success

This module aims to provide EarthCheck Coordinators and business Managers with an understanding of the planning and resource requirements for a sustainability program and the EarthCheck process. It explores the legal and regulatory framework for the travel and tourism sector and compliance requirements and introduces strategies for managing culture change.

This module relates to key step 3 of the EarthCheck Company Standard

Course Outline

- Understanding Roles & Responsibilities
- Managing cultural change
- Establishing your Green Team
- Define scope of your operations
- Planning & Resources
